Disinfectant Protocol Decision Tree

Is spot cleaning appropriate?

- Enclosure is visibly clean

- Same animal will be returning to enclosure

→ No →

Is the population high risk?

- Puppies or kittens <20 weeks of age

- Animals diagnosed with parvovirus, panleukopenia, calicivirus

- Animals vaccinated <7 days ago

- Immunosuppressed animals

Yes! Let's do that

Yes ↓

Use a parvocidal concentration and/or contact time

No ↓

Use a non-parvocidal concentration or an alternate disinfectant
